QUEENIE LEE
Chief Revenue Officer,
Bridgenet Solutions Sdn Bhd

Solutions achieved significant recognition by winning the 2024 Pikom Digital Excellence Awards (PDEA) in the Cybersecurity - Network Security category. The prestigious accolade was accepted by its chief revenue officer, Queenie Lee.

The award highlights Bridgenet Solutions' commitment to innovation and excellence in cybersecurity, underscoring its leadership in the technology industry.

What does winning the Pikom Digital Excellence Awards mean for you and your company?
Winning this award is a great honour for Bridgenet Solutions. It reaffirms our commitment to delivering innovative and cutting-edge cybersecurity solutions to our customers. This recognition is a testament to the hard work and dedication of our team and underscores our leadership and influence in the technology industry. It motivates us to continue pushing boundaries and deliver even greater value to our customers.

How have your solutions helped your customers in their business?
Our cybersecurity solutions have played a critical role in enabling organisations to operate securely and efficiently in today's digital landscape. By providing comprehensive protection against ever-evolving cyberthreats, we allow our customers to focus on their core business with peace of mind. Our solutions enhance resilience against attacks, protect sensitive data, and ensure business continuity, enabling our clients to grow and thrive without being derailed by security concerns.

What is your opinion on the technology industry in Malaysia?
The Malaysian tech industry is growing rapidly, driven by increasing digital transformation across various sectors. It is an exciting time as more companies adopt advanced technologies and recognise the importance of cybersecurity in today's environment. We see immense potential for further innovation, and Malaysia is well-positioned to become a centre for technology development. Bridgenet Solutions is proud to contribute to this growth by providing solutions that address evolving cybersecurity challenges.

As attacks continue, what is the best way to address cybersecurity?
Given the increasing sophistication of cyberattacks, a proactive approach is essential. Companies need to implement multi-layered security strategies that combine advanced technologies such as AI and machine learning with constant monitoring and threat detection. Equally important is promoting a security-conscious culture within the organisation, where employees are trained to recognise threats and follow best practices. Staying ahead of the curve with adaptive security measures is key to protecting both infrastructure and data in this fast-changing landscape.
