Cybersecurity 2030: Building Resilience in an AI-Driven, Borderless World

23 April 2026 | M World Hotel

ABOUT FUTURE OF CYBERSECURITY SUMMIT (FOCS)2026

The **Future of Cybersecurity Summit (FOCS) 2026** marks the 7th edition of this flagship event since its launch in 2019. Organised by the PIKOM Cybersecurity Chapter, the Summit brings together industry leaders, practitioners, and policymakers to address emerging cyber threats, evolving compliance demands, and the growing security challenges faced by organisations today.

As digital ecosystems shift toward hyper-connectivity, AI, and global integration, cybersecurity will undergo a major transformation by 2030. This theme explores how organisations and governments can build resilience in a world where cyber threats easily cross borders - "**Cybersecurity 2030: Building Resilience in an AI-Driven, Borderless World**"

"Cybersecurity 2030" examines AI's dual role as both a powerful defence tool and an advanced attack vector, alongside the rise of autonomous security operations, real-time intelligence, and predictive risk management. It also highlights growing challenges around cross-border data flows, digital sovereignty, and regulatory alignment. Ultimately, the theme focuses on strengthening digital trust, designing adaptive security architectures, and developing a cyber-ready workforce—calling for innovation and collective action to stay resilient in an AI-driven, borderless future.

Step into Cybersecurity 2030 with us and discover how AI, global connectivity, and emerging threats are reshaping the security landscape. Gain the knowledge and tools to build resilience and confidently navigate the digital future.

PARTNERSHIP PACKAGES

Date & partnership details may subject to change

Partnership Category	Platinum	Diamond	Gold	Silver	Networking/ Luncheon	Lanyard/ Conference Bag	Exhibition Booth (Supporting Partner)
Price (RM)	100,000	70,000	40,000	30,000	30,000	25,000	6,000
